

Characteristics – Domain and Range –

Domain		
Define: All possible values of x	Think: How far left to right does the graph go?	Write: [#, #]
Range		
Define: All possible values of y	Think: How far down to how far up does the graph go?	Write: [#, #]

Domain:

Range:

Domain:

Range:

Domain:

Range:

Domain:

Range:

– zeros and intercepts –

Y-Intercept		
Define: Point where the graph crosses the y-axis	Think: At what coordinate point does the graph cross the y-axis?	Write: (0, b)
X-Intercept		
Define: Point where the graph crosses the x-axis	Think: At what coordinate point does the graph cross the x-axis?	Write: (a, 0)
Zero		
Define: Where the function (y-value) equals 0	Think: At what x-value does the graph cross the x-axis?	Write: x = ____

Y-Intercept:

X-Intercept(s):

Zero(s):

Y-Intercept:

X-Intercept(s):

Zero(s):

Y-Intercept:

Zero(s):

Y-Intercept:

X-Intercept(s):

Zero(s):

– vertex and axis of symmetry –

Vertex		
Define: Highest or lowest point or peak of a parabola	Think: What is my highest or lowest point on my graph?	Write: Name the point (h, k)
Axis of Symmetry		
Define: The vertical line that divides the parabola into mirror images and runs through the vertex	Think: What imaginary, vertical line would make the parabola symmetrical?	Write: $x = h$ (x value of the vertex)

Vertex:

Axis of Symmetry:

Vertex:

Axis of Symmetry:

Vertex:

Axis of Symmetry:

Vertex:

Axis of Symmetry:

- extrema -

Maximum		
Define: Highest point or peak of a function.	Think: What is my highest point on my graph?	Write: $y = k$ (y-value of the vertex)
Minimum		
Define: Lowest point or valley of a function.	Think: What is the lowest point on my graph?	Write: $y = k$ (y-value of the vertex)

Extrema:

Extrema:

Extrema:

Extrema:

- end behavior -

Define:

Behavior of the ends of the function (what happens to the y-values or $f(x)$) as x approaches positive or negative infinity. The arrows indicate the function goes on forever so we want to know where those ends go.

Think:

As x goes to the left (negative infinity), what direction does the left arrow go?

Write:

As $x \rightarrow -\infty$, $f(x) \rightarrow$ _____

Think:

As x goes to the right (positive infinity), what direction does the right arrow go?

Write:

As $x \rightarrow \infty$, $f(x) \rightarrow$ _____

As $x \rightarrow -\infty$, $f(x) \rightarrow$ _____

As $x \rightarrow \infty$, $f(x) \rightarrow$ _____

As $x \rightarrow \infty$, $f(x) \rightarrow$ _____

As $x \rightarrow -\infty$, $f(x) \rightarrow$ _____

As $x \rightarrow -\infty$, $f(x) \rightarrow$ _____

As $x \rightarrow \infty$, $f(x) \rightarrow$ _____

As $x \rightarrow -\infty$, $f(x) \rightarrow$ _____

As $x \rightarrow \infty$, $f(x) \rightarrow$ _____

- interval of increase and decrease -

Interval of Increase		
Define: The part of the graph that is rising as you read left to right.	Think: From left to right, is my graph going up?	Write: [left, right] of portion going up
Interval of Decrease		
Define: The part of the graph that is falling as you read from left to right.	Think: From left to right, is my graph going down?	Write: [left, right] of portion going down

Interval of Increase:

Interval of Decrease:

Interval of Increase:

Interval of Decrease:

Interval of Decrease:

Interval of Increase:

Interval of Decrease:

Interval of Increase:

Identify the listed characteristics for the following graph.

Domain:

Range:

Vertex:

Max or Min:

Extrema Value:

Axis of Symmetry:

Zero(s):

Y-Intercept:

X-Intercept(s):

Interval of Increase:

Interval of Decrease:

As $x \rightarrow \infty$, $f(x) \rightarrow$ _____

As $x \rightarrow -\infty$, $f(x) \rightarrow$ _____

Average Rate of Change Notes

Average Rate of Change (AROC): The change in the value of a quantity divided by the elapsed time. For a function, this is the change in the y-value divided by the change in the x-value for two distinct points on the graph.

$$\frac{\Delta y}{\Delta x} = \frac{y_2 - y_1}{x_2 - x_1}$$

Finding AROC from a graph.

Using the problem, find the two points for which you are trying to find the average rate of change between. Then, use the formula to find the AROC.

Find the AROC of the interval $[-4, -1]$.

Find the AROC between $x = 1$ and $x = 5$.

Finding AROC from a graph.

Using the problem, plug in the two x-values (one at a time) to find the two points for which you are trying to find the average rate of change between. Then, use the formula to find the AROC.

Given $y = (x - 2)^2 + 6$, find the average rate of change between $x = -3$ and $x = 2$.

Given $y = -4x^2 + 6x + 11$, find the AROC of the interval $[0, 5]$.

Average Rate of Change Practice

1) Find the average rate of change over the interval $[-1, 3]$.

2) Find the average rate of change over the interval $-3 \leq x \leq 2$.

3) Using the equation $y = -4(x + 2)^2 - 6$, find the average rate of change from $x = -2$ to $x = 1$.

4) Using the equation $y = -x^2 - 6x + 2$, find the average rate of change for the interval $[-6, -2]$.

Characteristics Practice

- Domain:
- Range:
- Int. of Increase:
- Int. of Decrease:
- Max/Min:
- Extrema Value:
- Zeros:
- Y-Int:
- X-Int:
- As $x \rightarrow \infty, f(x) \rightarrow \underline{\hspace{2cm}}$
- As $x \rightarrow -\infty, f(x) \rightarrow \underline{\hspace{2cm}}$
- Vertex:
- Axis of Symmetry:

- Vertex:
- X-Int:
- Int. of Decrease:
- Zeros:
- Range:
- As $x \rightarrow -\infty, f(x) \rightarrow \underline{\hspace{2cm}}$
- Max/min:
- Axis of Sym:
- Domain:
- Y-Int:
- As $x \rightarrow \infty, f(x) \rightarrow \underline{\hspace{2cm}}$
- Int. of Increase:
- Int. of Constant:

Draw a graph that has the following characteristics:

- Vertex at $(3, 4)$
- End behavior of as $x \rightarrow -\infty, f(x) \rightarrow -\infty$
- Two zeros
- A y-intercept of $(0, -2)$
- A domain of $(-\infty, \infty)$

Then, identify the following:

Axis of Symmetry:

Range:

Interval of Increase:

Interval of Decrease:
