

Good morning!

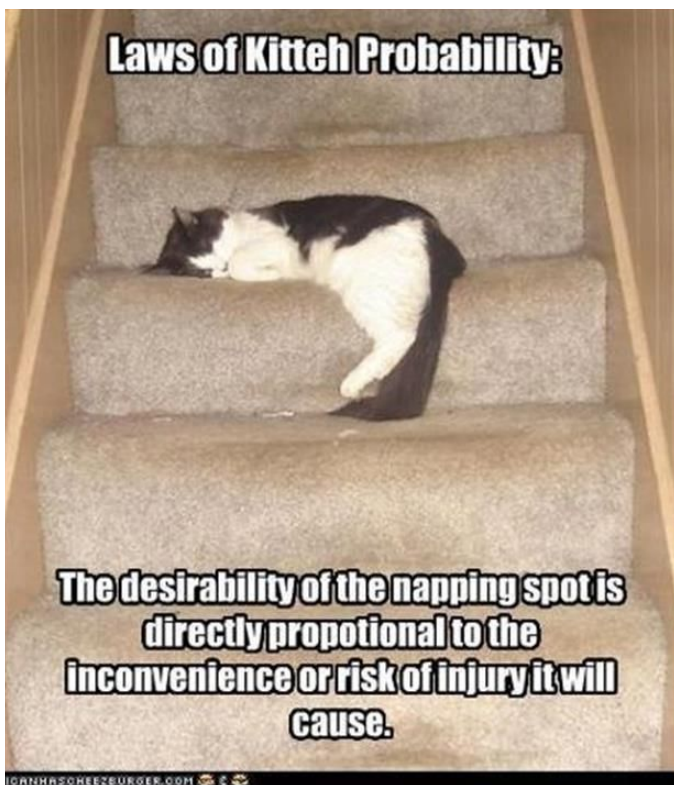

1. "Here"

2. Review for Probability Quiz

3. Take Quiz

*If... Given that  
Of... Out of... denominator*

**Laws of Kitteh Probability:**

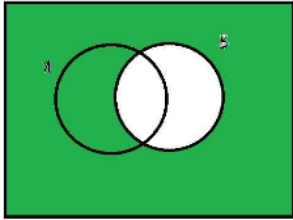

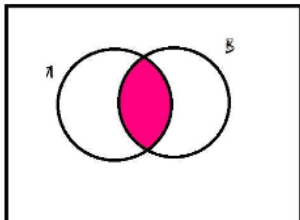

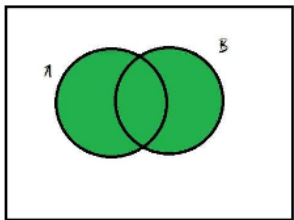

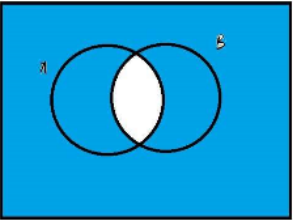

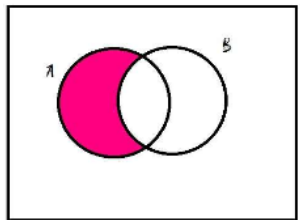

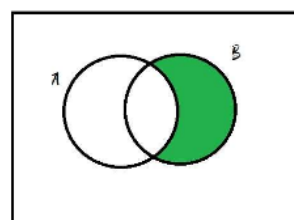

**The desirability of the napping spot is  
directly propotional to the  
inconvenience or risk of injury it will  
cause.**

Probability Practice Quiz

Set Notation and Venn Diagrams: Match the set notation to its Venn diagram. Each option will be used only once.

a. $A \cap B$	b. $(A \cap B)'$	c. $A \cup B$	d. $B'$	e. $B \cap A'$	f. $A \cap B'$
---------------	------------------	---------------	---------	----------------	----------------

		
1. $B'$	2. $A \cap B$	3. $A \cup B$
		
4. $(A \cap B)'$	5. $A \cap B'$	6. $B \cap A'$

Set Notation: Answer the following questions based on the universal set and subsets given below.

(Universal)  $\Omega = \{A, B, C, D, E, F, G, 1, 2, 3, 4, 5, 6, 8, 9, 11\}$

$\epsilon = \{A, D, E, F, 1, 2, 4, 6, \}$

$\xi = \{A, B, C, F, 1, 2, 3, 5\}$

7. List the elements of the set  $(\epsilon \cap \xi)$

$\{A, F, 1, 2\}$

8. List the elements of the set  $(\epsilon \cup \xi)$

$\{A, D, E, F, 1, 2, 4, 6, 1, 2, 3, 5\}$

9. List the elements of the set  $(\epsilon \cup \xi)'$

$\{G, 8, 9, 11\}$

10. List the elements of the set  $(\epsilon \cap \xi)'$

$\{B, C, 3, 5\}$

11. Draw a Venn Diagram to Represent the Sets:

"I wish we hadn't learned probability 'cause I don't think our odds are good."

**Probability**

Find the experimental probability of the following events. Your answer should be a fully reduced fraction.

12. Bridget categorized all the people who entered the theatre for a show by their hair color. The data is shown in the table below

black	13
gray	35
brown	22
+	
70	

- a. Determine P(black) :  $\frac{13}{70}$
- b. Determine P( gray) :  $\frac{35}{70} = \frac{1}{2}$
- c. Determine P(black or brown) :  $\frac{13 + 22}{70} = \frac{35}{70} = \frac{1}{2}$

13. An ice cream store recorded its sales for the week in the summer. Their data is shown below.

mint	307
rocky road	219
mocha	244
+	
770	

What is the experimental probability that the next cone sold is mocha? Your answer should be a fully reduced fraction.

$\frac{244}{770} = \frac{122}{385}$

14. Determine the following probabilities from the table below:

	Organic	Non-organic	
Apples	3	8	21
Peaches	5	3	9
Blueberries	3	12	25
	13	23	55

- a. P(Apple and Non-Organic) =  $\frac{8}{55}$
- b. P(Apple or Non-Organic) =  $\frac{36}{55}$
- c. P(Blueberries or Peaches) =  $\frac{25}{55} + \frac{9}{55} - \frac{0}{55} = \frac{34}{55}$
- d. P(Blueberry and Organic) =  $\frac{13}{55}$

e. P(Blueberries or Organic) =  $\frac{25}{55} + \frac{32}{55} - \frac{13}{55} = \frac{44}{55} = \frac{4}{5}$

$P(A \cup B) = P(A) + P(B) - P(A \cap B)$

15. Determine the Following probabilities from the data:

P(A) = .8 P(B) = .5 P(A ∩ B) = .4 Determine: P(A ∪ B) =  $.8 + .5 - .4 = .9$

16. P(C) = .6 P(B) = .5 P(C ∪ B) = .8 Determine: P(C ∩ B) =

$P(C \cup B) = P(C) + P(B) - P(C \cap B)$

$P(C \cap B) = P(C) + P(B) - P(C \cup B)$

$.6 + .5 - .8 = .3$

$$\cup \quad \text{OR} : P(A \cup B) = P(A) + P(B) - P(A \cap B)$$

$$\cap \quad P(A \cap B) = P(A) + P(B) - P(A \cup B)$$

OR : Add

AND : Both, intersection

---

Conditional : change denominator

if....

given....

of....

From....

out of....

Determine if the following are mutually exclusive or overlapping, then find the probability of each.

17. In a deck of cards find the probability of drawing a Jack or a heart.

Mutually Exclusive or Overlapping? \_\_\_\_\_

P (Jack or Heart) = \_\_\_\_\_  
 $\frac{4}{52} + \frac{13}{52} - \frac{1}{52}$

18. In a deck of cards, find the probability of drawing a Queen or Even Numbered card.

Mutually Exclusive or Overlapping? \_\_\_\_\_

P(Queen or Even Numbered Card) = \_\_\_\_\_  
 $\frac{4}{52} + \frac{20}{52} = \frac{24}{52}$

19. You're rolling two dice and looking at their sum. What is the probability of rolling an even sum or a sum greater than 8?

Mutually Exclusive or Overlapping? \_\_\_\_\_

P(Even sum or Sum greater than 8) = \_\_\_\_\_

$$\frac{18}{36} + \frac{10}{36} - \frac{4}{36} = \frac{24}{36} = \frac{2}{3}$$

	1	2	3	4	5	6
1	2	3	4	5	6	7
2	3	4	5	6	7	8
3	4	5	6	7	8	9
4	5	6	7	8	9	10
5	6	7	8	9	10	11
6	7	8	9	10	11	12

20. Answer the questions about probabilities from the sum chart.

a. P (Even sum and sum greater than 8) =  $\frac{2}{3}$

b. P(odd sum or sum less than 6) = \_\_\_\_\_

c. P(sum of 12 or sum of 3) = \_\_\_\_\_

$$\frac{1}{36} + \frac{2}{36} = \frac{3}{36} = \frac{1}{12}$$

	Small box	
green	1	2
blue	5	6
		8

What is prob.  
of getting green  
given that it is  
large?

$$\frac{2}{8} = \frac{1}{4} = .25$$
